REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

20253-71466

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,065,569, granted May 23, 2000 and for which a reissue patent is sought on the invention entitled Container For Sharp Instruments

the specification of which

☐ is attached hereto.

☒ was filed on July 3, 2003 as reissue application number 10/613,144

and was amended on _____
 (If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 385(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

Applicant claimed more than he had the right to claim in Claim 1 of U.S. Patent No. 6,065,596 when he claimed an apparatus comprising: a scalpel and a container holding said scalpel, said scalpel including a blade attached to a handle, said scalpel having a major cross-sectional dimension and a minor cross-sectional dimension; and said container including: an elongated scalpel recess closed at each end and receiving said scalpel, and having a first portion receiving said scalpel blade and a second portion receiving at least part of said scalpel handle, said portions having a width slightly greater than that of the major cross-sectional dimension of the scalpel and depth slightly greater than that of the minor cross-sectional dimension of the scalpel, the length of said scalpel recess being such that the scalpel blade is located within one of said portions irrespective of the position of the scalpel in the scalpel recess, and guide means for guiding a scalpel placed in said container to said scalpel recess: the arrangement being such that the scalpel received within said scalpel recess is positioned therein such that the scalpel blade is not directed towards the opening of the scalpel recess whereby a user's fingers are substantially prevented from contacting a cutting portion of the scalpel blade.
